DIGITALISING SINGAPORE'S LOGISTICS SERVICE PROVIDER INDUSTRY

“The measure of intelligence is
the ability to change”

- Albert Einstein

**A unique experience of six top management
roundtable sessions and site visits
to leading logistics organisations**

1 APRIL – 3 JUNE 2022

Industry thought leaders, experts and leading practitioners
will share on **state-of-the-art supply chain knowledge**
combined with **real-life operational experiences**

Six sessions of site visits, presentations and roundtable discussions

MODULE 1: 1 April 2022

The challenges of Digitalisation and Singapore's changing business environment - High-level perspectives of Government and public policy

MODULE 2: 8 April 2022

Digitalisation initiatives by industry leaders in the global forwarding and container-line industries

MODULE 3: 22 April 2022

The role of logistics service providers in the Digitalisation of pharmaceutical and life sciences industry supply chains

MODULE 4: 29 April 2022

Promises and challenges of new digital technologies for logistics and supply chain operations

MODULE 5: 27 May 2022

Digitalisation for contract logistics services, warehousing operations and shipper-provider relationships

MODULE 6: 3 June 2022

Challenges of digitalising petrochemical and other process industry logistics, and the issue of digital security in supply chains

OBJECTIVES

The Roundtable will provide senior management from large companies and SMEs with the **TRANSFORMATIONAL VISION & OPERATIONAL STRATEGIES** on:

- ❖ **The opportunities and challenges of digitalisation**
- ❖ **In a time of sharply increasing international competition**
- ❖ **And an ever more volatile and sensitive economic environment.**

The modules of the programme will expose participants to the specific issues, challenges and innovative approaches to Digitalisation, touching the most important segments of Singapore's transport, logistics and supply chain services markets: global forwarding and container-line operations; the pharmaceutical, health care and life sciences industry; contract logistics, intralogistics technology, petrochemical and broader process industries.

STRUCTURE

A series of **six physical, 4-hour sessions**, comprising presentations, on-site visits and problem-solving discussions:

- In a small group of peers from a diverse variety of companies within the industry,
- Adding up to an attractive, motivating and flexible part-time programme of 24 hours of attendance,
- Coordinated and delivered by a select group of industry thought leaders, experts and leading practitioners.

KEY TAKEAWAYS

- ✓ Participants will achieve a broader, critically reflected understanding of the challenges and opportunities of state-of-the-art digitalisation terms, tools and change approaches.
- ✓ Based on the site-visit observations and inspiration, expert inputs and the roundtable and peer discussions, participants will take home new ideas to consider and implement in their own organisations.
- ✓ They will be motivated to continue their own networking and learning.

PROGRAMME FEE

The fee for the Programme, which covers all six modules, is **SGD2,500**.

WHO SHOULD ATTEND

CEO, COO, CIO, CTO, top management and senior executives of supply chain, logistics and IT companies, and organisations with extensive supply chain requirements/networks.
