

Next Generation Report

April 2021

In depth reports have been circulated within the different regions. This report simply highlights the key activities and focus points for ease of awareness.

Key focus currently:

Branding

- Whilst we wait confirmation on options for branding of Next Generation two members of the group (Biman and Nlaliban) will join the brand guidelines refresher calls in May to support initial steps.
- Next Generation members keen to have identifying brand, but still be within the wider guidelines. Once decision made we can look to “how” this is carried out.

Webinars + Events

- Following the successful webinar on sustainability in February hosted by Next Generation globally, in March the Next Generation teams in Tanzania (Moh'd Masoud and Cyprian Moses leading) hosted a session on Tacking Covid-19 impacts in lower income countries.
- Discussions are taking place to find new voices from our Next Generation members to speak in a future webinar September onwards (potentially looking at the new format of “in conversation” style).
- CILT Central Asia official launch via Zoom of new Next Generation group in March. Calls planned mid May to support them on next steps within the region.
- CILT North West UK Next Generation looking to host digital quiz night in mid June, high engagement from 2 local universities with good international links a strong start to refreshing the approach.

Website

- Due to personal work constraints this has yet to be finalised, and delays being faced.
- Expecting details from key committee members by end of May.

Committee meeting/calls

- Due to time zones we do struggle to ensure all regions are able to join so communication is mainly kept via whatsapp and other formats at present.
- We would encourage all regions to ensure the local Next Generation representatives are included and invited to where able to any local meetings to ensure involvement at local level not just global.
